**FLECK'S DEPENDABLE BULBS**

# *Fleck's Croft Lilies*

**Finest True Strain, Highest Bud Count**

(WASHINGTON STATE GROWN)

Those who already know our brand of these fine Lilies, always reorder the following year. There must be a reason.

**A House of Fleck's Croft Lilies Just Before Easter.  
Note high bud count.**

The following is typical of many letters we receive:

**From Williamsburg, Va.**

Place my order again for next season. The ones I got from you last year were A No. 1.

**From North Jersey**

Bulbs were fine. Had 1000 blooms on the 250 bulbs.

I want a case of 250 for 1951.

**From Rhode Island**

Last years' 7/8's were beautiful. We realized 100% perfect blooms. Hit Easter right in time. Send 2 cases this year

Order now for Easter 1952 forcing. Also for shipments from cold storage—December through April for continuous cuts next Spring and Summer.

Size	Case	Per Case
7- 8-	50 bulbs.....	\$13.50
7- 8-	100 bulbs.....	24.70
7- 8-	250 bulbs.....	59.50
8- 9-	50 bulbs.....	22.00
8- 9-	100 bulbs.....	41.00
8- 9-	200 bulbs.....	80.00
9-10-	50 bulbs.....	26.50
9-10-	150 bulbs.....	73.00
10-11-	50 bulbs.....	34.00

Compare lily bulb prices by the bud count, not by the case. Our Croft are priced low on the basis of blooms per bulb.

For those who cannot maintain an even 60 to 65 degrees (night temp.) we recommend precooled bulbs for Easter or early forcing.

Precooling charged at cost.

Cultural directions sent with order or on request.

We can supply all other types of  
Lilies for florists use, but

#### Culture

*Soil* should be slightly acid, pH 6.2 to 6.5. One part leaf-mold, rotted manure and loam. Good drainage is necessary.

*Light* is important. Give as much strong light as possible without burning leaves, otherwise colors will not be bright.

*Temperature* should be 80 to 85 degrees, the higher the better. Reduce heat gradually to harden off plants. Start the bulbs in flats and place on steam flows if possible.

*Water* sparingly until sprouts and roots are 4 to 6 inches long, then shift to 5 or 6 inch pots. Never allow the pots to dry out when in full growth.

### Gloxinia Culture

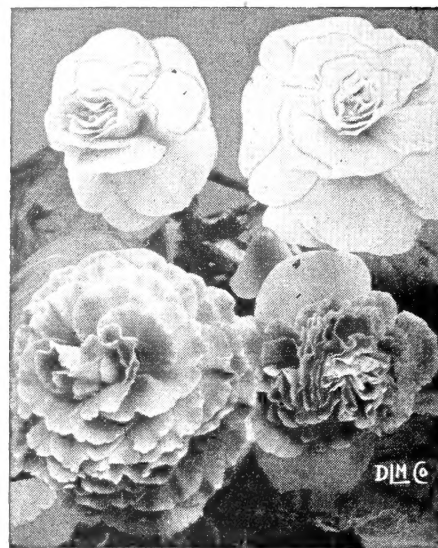

Gloxinias are a companion for the tuberous-rooted Begonias and fancy-leaved Caladiums. Start the tubers in 4-inch pots in a mixture of leafmold, sand and a little well-rotted cow manure with good bottom heat. Keep shaded and as the leaves appear, be careful with the watering. Use the watering can, and go over each plant carefully. Don't apply water unless it is needed; on the other hand, they suffer every bit as much if they don't get water when ready for it, for they want a moist soil. Keep the leaves dry. Plants prefer light shading.

## RANUNCULUS (Top Size)

These claw-like bulbs should be planted with the claws downward, 2 inches deep, 10 inches apart. Vivid colors. Handle similar to Anemones.

## BEGONIAS - Tuberous Rooted

**Camellia Flowering**

Ready December

These make excellent pot plants in a short time for Winter and Spring sales.

### Cultivation

Forcing can be started in February, March, or April. Place bulbs in boxes, on light, porous soil close together, then cover with earth to a depth of 1 inch above the bulb. The earth should be kept just moist, too much water will rot the bulbs. When the plants begin to develop, place them in pots. Plants prefer light shading.

Originator's Packets

**Special Note**—Seed should be sown late June or July for Winter flowering in Northern States. Late July or early August in Southern States. High temperatures retard germination. Select a cool location for the seed flats where there is good air circulation. Water sparingly but keep moist, until seedlings are well established. We recommend using sterilized soil and it should not be fertilized. Dust seeds with Proliferol or Hormo-Root before sowing.
